

Syringe Filters

25 mm Sterile and Non-Sterile Syringe Filters

Meissner's 25 mm syringe filters are convenient, reliable, ready-to-use devices for scale-up evaluation and laboratory applications. The filters are available with SteriLUX® polyvinylidene fluoride (PVDF) and STyLUX® polyethersulfone (PES) membranes.

25 mm syringe filters can be used to evaluate Meissner membranes for eventual scale-up to Meissner capsules, cartridge filters, UltraCap® and UltraCap® H.D. (Heavy Duty) high capacity capsule filters. They can also be used for filtration of analytical samples.
